## New Town Council Meets.

The inaugural meeting of Stony Plain's 1934 town council was held in the town hall on the evening of Thursday, March 1, with Mayor Otway presiding.

Thetwo newly elected members of the board, Messrs Barh and Breikreutz, were introduced.

Among the matters up for discussion was a request from a Main St. business man for permission to move a building thru the streets. Permission was granted, on the understanding he was to be responsible for damage to pavements and crossings while building was in transit.

When it came to appointing the committees for the coming year, it was decided to take the work of looking after the buildings from the Building and Roads committee and transfer the work to the Fire and Light committee.

The committees struck were Roads - H Oppertshauser (chairman) and J Christie.

Fire and Building - A E Michael (chairman) and Otto Hoffman.

Sanitation and Hospitalisation - R Breikreutz and Wm Barh.

## Free Tractor Show.

What will, undoubtedly, prove of interest to power farmers and to members of their outfits is the announcement that a tractor school short session will be held in Stony Plain on the evening of Thursday March 22. A free motion picture show will be given at the same time. At this there will be shown the newest models of the distillate fuel type, and also the well-known Diesel tractors. Moose hall is the place, and the whole show is free, and no doubt will prove interesting and informative to grain raisers, whether they are, or are not as yet, in power farming.

## Stony Plain and District

Banker J F Cullen has been transferred to the Bank of Commerce branch at Andrew, Alta. An official of the branch there, Mr Robertson, has taken over Mr Cullen's duties here.

Mr Philip Singer, Edmonton, was a business visitor in Stony on Saturday.

The interior of the Hardwick Departmental Store is being remodelled and brought up to date with an outfit of new interior fittings. The work is being done by Contractor E Anderson.

A party from the Oxford Group in Edmonton will hold a service at Heatherdown hall on Sunday next, the 11.

A dance is billed for Warden school tomorrow night the 9th.

Walther League members are learning their parts for the new playlet soon to be produced here "Wild Oats Boy."

## A Toll Equal To War

Once a year for several years past with the approach of Spring which heralds, among other important happenings, the return of tens of thousands of motor cars and trucks to the highways of the country, attention has been directed in this column to the responsibility which rests upon the drivers of these cars and trucks to exercise due caution in their operation. Once again the attention of all motorists is drawn to this vitally important matter.

With the invention of the motor car, a new machine of great utility, as well as a source of pleasure, was provided. It is a machine of great power, and with the passing of the years the power of the individual car or truck has steadily increased. In so far as the machine itself is concerned, and keeping pace with its increased power and speed, there has been consistent improvement in its strength and in the provision of manifold safety devices. The modern car is, therefore, less liable to accident than its predecessor of fifteen, ten, even five years ago.

Further, with the enormous increase in the number of cars and trucks in use, there has been a great improvement in highway construction and maintenance, calculated to decrease accidents. On the other hand, these better highways have made possible driving at greater speeds than were possible upon the old roads of bygone years and have encouraged the purchase of many more cars, both of which factors have resulted in greater density of traffic, and traffic moving much more rapidly.

This, to a greater degree than ever before, the human factor—the man or the woman at the wheel—becomes the controller in the matter of accidents. Unfortunately, far too many drivers fail to appreciate the enormous power of the machine they are operating—a power for destruction just as truly as a power for transportation. It is a power within the control of almost countless thousands of individuals which, improperly controlled, may mean death and injury not only to the careless and reckless motorist, but to others who are exercising every possible care and driving with the utmost caution and consideration for others.

"What was that?" was the pointed question asked in the British House of Commons recently, during a debate on a motion dealing with the serious increase in the number of road accidents, when the Home Secretary submitted figures of "killed and injured" in road accidents in Great Britain in the eight years 1926-33. The figures were: Killed, 50,837; injured, 1,421,083. Furthermore, the detailed figures revealed an increase in the toll taken in each succeeding year.

Such was the record in a country noted for its good roads, for the excellence of the workmanship upon its cars, and for general observance of laws and regulations. It is a record which establishes how necessary it is that the motorist should exercise the greatest care at all times and under all circumstances in the operation of his or her car.

At this time, owing to prevailing economic conditions, many people are operating cars which, under other and better conditions which prevailed a few years ago, they should have replaced with new cars. They are still using worn out tires which in other years they would have replaced with new and stronger tires. Because of the necessity of keeping expenditures for repairs down to a minimum, many cars have not been overhauled as in former years; brakes may not be in full working order; lamps may be defective; springs and bolts and other accessories may be worn thin, right to the breaking point. Such cars, if operated at an undue speed, may easily spell disaster not only for the driver and passengers, but for other motorists or pedestrians. All persons whose cars are not in absolutely first class condition under the great responsibility of driving with unusual care and observing every regulation. In fact, they owe a duty to themselves and to all other people not to operate their cars if they are in a condition dangerous to operate.

But whether a car is in first class shape or not, the oft-repeated and emphasized duty which devolves upon all motorists remains. That duty is to know and to observe the accepted regulations governing traffic upon the highways and to obey the laws enacted for the protection of all and in the common interest of all. Even if laws and regulations did not establish a code of conduct for both motorists and pedestrians, there is the courtesy of the road which should be maintained and observed. Men should conduct themselves as gentlemen and women should behave as ladies. Courtesy should prevail over selfishness.

Instead of the present appalling record of accidents; instead of that record mounting higher year after year, a change for the better, a lower record, can be and ought to be established in 1934. It lies in the power of the individual motorist to bring about such a desirable result, and the motorist, more than any other person, will benefit therefrom.

### Made Many Rescue Flights

During the last five years between 300 and 400 rescue flights have been undertaken by the ambulance plane of the Red Cross Aerial Ambulance Service of Sweden, many under the most dangerous and difficult circumstances in a temperature of 40 degrees centigrade below zero, in the face of blizzards, in darkness and fog with adventurous descents in unknown places.

### A Strict Censorship

No amount of "cutting" will let a film pass a German censor under a new law now in effect—once the film has been placed on the blacklists. The law, which virtually authorized the Propaganda Ministry to veto or censor a film before it is made, provides that foreign films which in their original version seem derogatory to German interests may not be shown in Germany.

## Health For Young Girls Happiness For Tired Women

Thousands of women become tired out and run down, become thin and pale, and profound weakness takes life a burden. The whole outlook of life is changed when the nervous, sick headaches, the sleeplessness, the spells of dizziness, of weakness and discouragement, and the tired, languid feelings disappear with the use of Milburn's H. & N. Pills. They tone up the nerves, enrich the blood, and bring the health back to normal again.

Introducing Anna and Tekla, Little Lithuanian Ladies, unable to speak English and travelling all the way from Kovno to Western Canada. Tekla, the diminutive damsel with the doll is just three and a half years old, and her friend just turned five. Both came over aboard the Canadian Pacific liner Montclare in charge of steamship officials—Anna goes to join daddy at Nipawin, and Tekla continues on with daddy to her folks at Edmonton, Alta.

## SHE LOST WEIGHT EACH WEEK

### The Ideal Way To Reduce

A woman writes to tell how she is reducing excess fat—and her way seems to be the ideal way. "I am 49 years old, 5 ft. 5 1/2 ins. in height, and was 180 lbs. when I started taking a level teaspoonful of Kruschen Salts every morning. I went slowly down in weight—some weeks 2 lbs., others just 1 lb., until I got down to 154 lbs. I have never felt better in my life than I do now, and I feel so much lighter and feel years younger."—(Mrs.) W. I.

The action of Kruschen Salts, taken regularly every morning, is to effect a natural clearance of undigested food substances and watery waste matter. It is that waste matter which is stored up in the form of ugly fat, if it is not regularly expelled.

### FREE TRIAL OFFER

If you have never tried Kruschen—try it now at our expense. We have distributed a great many special "GIFT" packages which make it easy for you to prove our claims for yourself. Ask your druggist for the new "GIFT" package. This consists of our regular 75c. bottle together with a separate trial bottle—sufficient for about one week. Open the trial bottle first, put it to the test, and, if not entirely convinced that Kruschen does everything we claim it to do, the regular bottle is still as good as new. "Put it back." Your druggist is authorized to return the regular bottle to us if you are not satisfied. You have tried Kruschen free, at our expense. Write to: Kruschen Laboratories, Ltd., 100, St. George Street, London, E.C. 4, England. Importers: Modlinvay Bros., Ltd., Toronto.

What we can't understand is why a daring flyer gets more credit than those who fly the same route to look for him.

## OFF COLOUR? HOW IS YOUR LIVER?

Wake up your Liver! Without Calomel.

Your liver is a very small organ, but it is certainly one of your digestive and eliminative organs. It filters out of your blood all the poisons that it finds. If it is not working properly, it will allow the poisons to build up in your system, and you will feel the effects. You won't completely correct such a condition by taking salts, oil, mineral water, laxative candy or chewing gum, or roughage. When they've moved your bowels they're through—and you need a liver stimulant.

Cutter's Little Liver Pills will soon bring back the sparkle to your eyes. They're purely vegetable. Safe. Sure. Ask for them by name. Refuse substitutes. See at all druggists.

### China's Unclaimed Dead

A total of 17,538 unclaimed bodies were found in the streets, creeks, and on the waterfront of Shanghai during 1933, according to the annual report of the Dong Jen Fu-An Tong Benevolent Society. This society, entirely financed by Chinese, dedicates itself to burying the city's unclaimed dead and to providing coffins for poor families as well as giving free medical service to paupers.

Japan now claims to lead the world in the export of cotton goods.

## When Painting Was Crime

Considered Sign of Worldliness in Early New England

Paint, now recognized as a protection and a beautifier, was considered a sign of worldliness and vanity in early New England. In 1630, a clergyman of Charlestown, Mass., was hailed before the city council, charged with the serious crime of painting the interior of his house. During the next forty years there was not a painter in all New England.

## Delicious Cream Cookies

- 1 cup Mazola
- 4 beaten eggs
- 1 cup nut meats
- 1/2 cup chopped raisins
- 1 teaspoon vanilla
- 4 cups flour
- 2 cups brown sugar
- 1/2 cup sweet cream
- 1/4 cup Crown Brand Corn Syrup
- 1 teaspoon lemon essence
- 1 teaspoon salt
- 1/2 cup Benson's Corn Starch
- 4 teaspoons baking powder.

Cream the Mazola with the sugar and then add the eggs and beat until light. Mix the cream with the corn syrup and add to the batter alternately with the dry ingredients sifted together and mixed with the nuts and raisins. Flavor and drop by spoonfuls on buttered baking pans and cook in a moderate oven (350 degrees).

## Nothing Accomplished

Just thirty years ago Japan declared war on Russia. Now they are knocking the chips off each other's shoulders again, and should they come to blows there will be a like outcome. Yet of what avail will it be if one overcomes the other, except it bring joy and gold to the munition factories of other countries.

## Too Much Uric Acid

is a very common cause of Rheumatism, Sciatica, Lumbago. Drugged kidneys allow an excessive amount of uric acid to accumulate. Take Gin Pills to give relief while they are assisting your kidneys to function normally.

## Canada Becoming An Important Radium Producer, With Steady Output From Great Bear Lake

Scarcely four years after the initial discovery of radium ore at Great Bear Lake, Northwest Territories, Canada has become an important producer of radium, with one mining company maintaining a steady production from its refinery at Port Hope, Ontario, output from which already amounts to a few thousand milligrams. This company, which operates the Labine Point deposits at Great Bear Lake, is confident of its ability to continue to deliver a steady output of radium. The initial output has already been disposed of, the province of Ontario purchasing several hundred milligrams for use in its various cancer clinics. As production increases, radium will become available to fill the needs of the Dominion and of other British countries. In addition to radium, the company produces important quantities of uranium compounds, which enjoy an active demand from manufacturers of glass and porcelain, with the bulk of the present output going to the British Isles.

Contrary to a somewhat prevalent belief, the Canadian Government is in no way connected with the commercial production of radium, the work of the Federal Department of Mines in devising the method now used by Eldorado as a basis for the treatment of the ore, and in mapping the area, being in the nature of services rendered to the mineral industry. Neither is any control exercised by the government as to the price of the radium. For a time, at least, radium production will be on a moderate scale and it is not expected that operations will result in any immediate large addition to the existing world supply of the element.

### The Agricultural Situation

Report Just Prepared Deals With Many Fads Of Interest To The Farmer

In order to direct the attention of farmers and others to the valuable information available in various government departments, ten committees, composed of officials of the Departments of Agriculture and Trade and Commerce, have been at work for several weeks bringing together statistics and other information covering the entire agricultural situation. The completed report, which may be obtained from the Publications branch, Department of Agriculture, Ottawa, deals with supply and demand, competition and prices, movements to market and marketing, storage holdings and farm products, production trends and in short every subject of importance, domestic and foreign.

### Increase Is Alarming

Deaths From Organic Heart Disease Are Becoming More Frequent

In view of the alarming increase in deaths in Ontario from organic heart disease—in 1932 there were 6,670 such deaths recorded, as compared with 5,757 in 1922, a jump of 78 per cent in ten years—Hon. Dr. J. M. Robb, minister of health, sounded what he termed "a solemn note of warning" to all young-old men and women of 50 and upwards, to "act their age."

"Above all," said he, "they should see that they have regular hours of rest, and that they submit themselves to periodical medical examinations which, after all, is not only their best safeguard, but an essential duty they owe to themselves, their families and their dependents."

### A Helpful Suggestion

Letters addressed to newspapers sometimes get to the wrong department. An instance in point is that of the lady who wrote the household editor, asking "How do I get green paint off my hands?"

Unfortunately, her inquiry was sent to the advertising department. It, however, brought an immediate reply: "Why not use large space for a few days and offer it at a great reduction in price?"

W. N. U. 2034

### Relics Of Other Times

For Robes First Worn In English Law Courts For Warmth

The judge's ermine and the mayor's full collar are relics of the times when the temperatures of law courts and banquet halls in England made them not an ornament but a necessity. Even at coronations it was hopeless to try to warm the Abbey, so the King and his august subjects were warmed instead, and modern sovereigns have cause to remember how chilly their ancestors felt when they in turn stifle under the same heavy fur robes. So cold were the homes of England that those who could afford it even slept in furs, and an old account book mentions the purchase of seventeen skins to make a nightgown for Queen Elizabeth.

By Ruth Rogers

550  
A SMART LITTLE TAILORED  
FROCK IN NECKTIE SILK  
FOR WEAR IN TOWN

If you want a conservative dress that is especially smart for school, college, office or general day wear, here's your pattern.

Necktie silk in soft brown tones made the original. The shirtwaist collar finished with an orange crepe silk tie.

Similar schemes in crepe silk in navy with powder blue tie, black with bisque or bright green, bright copper red with red and white print tie, etc., would be smart.

Lightweight woolsens also make up most attractively in this model.

Choose ribbed or striped cottons, linen and tub silk for resort wear.

Style No. 550 is designed for sizes 14, 16, 18, 20 years, 22, 24 and 40 inches bust.

Size 16 requires 4 yards of 38-inch material with 1/4 yard of 35-inch contrasting.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap carefully.

### Ideal For Young Cattle

Combination Of Oats And Barley Good Start For Grain Food

In the feeding and management of beef cattle, particularly in times of low beef prices, one of the main objectives is to make the maximum use of inexpensive homegrown feeds and pastures.

Canadian grown barley, oats, wheat and corn are excellent feeds for beef cattle. Barley is probably the most important of these grains. It is widely grown in Canada, is an excellent fattening feed and produces beef of a high quality with fat of a nice white color. In feeding trials conducted both in Canada and the United States, barley has been shown to be practically the equal of corn in the beef ration.

Oats have a tendency to produce growth rather than to fatten beef rapidly. This is due to the fact that they are higher in fibre, bulkier, and richer in protein than barley or corn. A combination of oats and barley is ideal for young cattle or for steers just starting on grain feed. At first the per centage of the two can be about equal, but as the steers approach a finish the proportion of barley should be raised.

Wheat is best when fed in a mixture. In fact, a mixture of the grains, if available, is best at all times. Although wheat is usually too high in price to be economical, its feeding value is as high as barley or corn, and it can be fed up to thirty-five per cent. of the grain ration.

Although corn is produced only to a limited extent in Canada, it is a good beef cattle feed and when available should be included in the ration. Many feeding experiments have indicated that a variety of grains and roughages produce the best results. The grain mixture should be supplemented with protein feeds such as linseed oilmeal, ground flax seed, etc., when the quality of hay is inferior.

Good pastures alone will carry all classes of beef cattle, except those being given a high degree of finish for market. It is advisable in finishing beef on pasture to feed some grain if the cattle are of sufficiently good quality to warrant the extra cost. Experiments have shown that cattle finished on grass with grain as compared to those finished on grass alone have a distinctly higher dressing per centage and yield better finished, more attractive carcasses which command the highest price. Fewer cattle more highly finished by the use of Canadian coarse grains will go a long way to solving the question of higher prices and greater returns.

Division of Animal Husbandry, Central Experimental Farm, Ottawa.

Our nearest fixed star, Alpha Centauri is about 25,000,000,000,000 miles away. Now any of you people who harbor any ideas about going places in rockets think again.

## Separate Grading Of Garnet Wheat Is Sought By Vancouver Grain Exporters' Association

### Canada's Trade With Brazil Has Improved

Wheat, Apples And Rubber Exported To South Last Year

Canada improved her export trade to Brazil in 1933 by more than \$700,000, according to a statement from the Department of Trade and Commerce.

Canadian wheat re-entered the Brazilian market in 1933 after an absence of two years. In 1928 Canada shipped 500,000 bushels to that country, but did not export any more until 1930, when 205,333 bushels were sent. In 1933 Canada exported 279,076 bushels, valued at \$170,713.

Canadian apples were introduced into Brazil last year with shipments totalling 1,970 barrels, valued at \$9,805.

Rubber tire casings to the extent of 77,966 were shipped to Brazil last year, as compared with 36,076 the preceding year, and 39,709 tires, as compared with 19,880 in 1932.

### Searching For Rare Bird

Scientists Taking Long Journey To Find Zoological Specimen

With the aim of capturing Australia's rarest bird, the night parrot, eight scientists recently set out from Melbourne, Australia, on one of the longest journeys ever made in search of a zoological specimen, reports an official of the Canadian National Steamships, whose vessels ply between Canada, Australia and New Zealand. This bird flies by night and hides by day, and the scientists expect to travel 5,000 miles before they secure a specimen. The night parrot was first found by white men 80 years ago. One of the members of the expedition has been admitted a member of a native tribe whose bushcraft in tracking animals and birds is almost uncanny.

### Carried Out Instructions

An ambitious lady, about to entertain a Duchess for the first time, gave very careful instructions to the maid who was to open the door about the fashion in which the great lady was to be received.

"Now, Mary," she said, "remember whenever you address the Duchess you must say 'Your Grace'."

When the great day arrived and the maid opened the door to the Duchess and the latter inquired if Mrs. — was at home, the maid answered: "Yes, ma'am she is, and may the Lord make us truly thankful for what we are about to receive."

Toronto's relief costs in 1934 it is estimated will reach \$2,350,000.

### Amendments to the Canada Grain Act to provide for separate grading of Garnet wheat are sought at Ottawa by the Vancouver Grain Exporters' Association on the grounds that overseas millers report unsatisfactory milling results when Garnet wheat is mixed with Marquis.

The action was requested in a letter to Hon. H. H. Stevens, minister of trade and commerce. The association pointed out that Vancouver is particularly concerned because most of Canada's Garnet wheat is grown in Alberta and shipped through Vancouver.

The letter cited the spread at Vancouver of 5 1/2 cents to six cents between No. 1 Northern, which is not permitted to contain Garnet, and No. 2 Northern, which contains Garnet. It compared this spread with that of only three cents, at Port William, where Marquis wheat predominates.

"The overseas miller makes the very natural request that he be given the opportunity of buying Garnet wheat separately in order that he may blend such types of wheat as may suit his particular requirements."

Further points out that a statutory western Canada grade of wheat should be exactly the same whether the shipment be received from Montreal or Vancouver.

The exporters expressed the belief pure Garnet wheat would command on its own merits a better price than the mixed shipments of Marquis and Garnet now going abroad. As No. 2 Northern is Canada's most used and best-known grade, they declare, its lack of uniformity of quality is a matter of national importance.

### Situation Was Reversed

Figures Covering Tourist Cars Last Year Are Interesting

During the past calendar year 2,233,418 tourist automobiles entered Canada for a period of 24 hours; 863,136 for a period not exceeding 60 days, and 333 for a period exceeding 60 days according to a statement issued by the Department of National Revenue. This showed a considerable falling-off as compared with 1932 when the total for a 24-hour period was 3,070,290, for over 60 days 1,032,967 and for over 60 days 420.

While the tourist traffic into Canada was falling off, Canadians were travelling by motor car in other countries more extensively than in the year before. The total Canadian automobiles exported for touring purposes last year was 417,132, in 1932, the total was 376,857.

Ontario hosted the largest number of Canadian cars touring outside of Canada with a total of 164,795, but was closely followed by British Columbia with 125,266.

### Want Road Allowances Closed

Saskatchewan Stock Growers Want On Premier To Present Their Case

Saskatchewan stock growers and ranchers are seeking concessions from the provincial government to allow for the closing of certain road allowances for range countries along the United States border.

They are also asking that the government levy a flat rate of taxation for school purposes. Where roads are to be closed, they are asking the government for some form of rail-facility crossing for range traffic.

A delegation representing the Saskatchewan Livestock Growers' Association waited on Premier Anderson to place the requests of the association before him. R. Gilchrist, head of the growers' association, and W. Kerr, Maple Creek, head of the Sheep Growers' Association, were spokesmen.

### Reasons Unknown

Man: "Why do you weep over the sorrows of people in whom you have no interest when you go to the theatre?"

Woman: "I don't know. Why do you cheer wildly when a man with whom you are not acquainted slides to second base?"

### ITALIANS ON THE AUSTRIAN BORDER

Believed to be a result of the trouble in Austria, Italian troops concentration on the Austrian border indicates that Italy is prepared to take a hand should intervention in Austria become necessary. Here are two views of Italian troops manoeuvring in the Alps near the Austrian frontier.

**WORLD HAPPENINGS BRIEFLY TOLD**

Responsibility for keeping peace in the Far East was placed squarely up to Japan by the Soviet newspaper Izvestia.

A total of 256 persons were killed and 2,087 injured in railway accidents for the year ended December 31 last, according to a return tabled in the house of commons.

To Juan de la Cierwa, inventor of the autogiro, has been awarded the International Federations of Aviators trophy for the most outstanding aeronautical achievement in 1933.

John Raphael Rogers, whose inventions were combined with those of Othmar Mergenthaler to make the Mergenthaler Linotype machine, is dead in New York at the age of 77. He had patented more than 500 devices on typesetting machines.

W. J. Walsh, who resigned as Newfoundland's minister of agriculture and mines, was freed of criminal charges that followed an investigation into the disappearance of part of the government's vast collection of world stamps.

A service of passenger aeroplanes linking with the great railway services covering the United Kingdom and Ireland will come into early operation, promoted jointly by an air company and the four chief railway groups.

**HYDROGEN**  
(By Gordon H. Guest, M.A.)

Lightest of all gases, hydrogen was for many years used to fill the giant zeppelins, forerunners of the great airships which are rapidly becoming part of our modern travel system. Because it is highly inflammable, hydrogen is now being replaced by helium for purposes of safety.

Hydrogen is produced commercially by the electrolysis of water. An electric current is passed through water, which is thus decomposed into its constituent parts, hydrogen and oxygen. It is also obtained by passing steam over hot iron. The iron robs the water of oxygen, forming iron oxide, and leaves the hydrogen to escape as a gas.

Bubbling hydrogen through many naturally occurring oils, such as cotton-seed oil, fish oils and animal fats produces a marked change in these substances. Coloured and evil-smelling substances are destroyed and the oils and fats themselves are changed into more desirable solid fats. Fats made from vegetable oils are now produced in large quantities in this way and are widely used in cooking. This change in fats and oils is known as "hydrogenation" and this is the chief industrial use of the gas. Large oil stores and packing-houses have hydrogenation plants for converting the waste animal fats into valuable solid fats. The hydrogenation of low grade oils such as fish oil, produces solid fats used in the manufacture of soap and candles.

Another important modern use of hydrogen is in the manufacture of ammonia, which can be converted into nitric acid. Nitric acid is used in the production of high explosives. In Europe synthetic petroleum is being "hydrogenated" under pressure. At present production in this industry is on a very small scale.

**Startling Claim Made By German Statistician**

**Predicts Date of Death By Examining Patient's Eyes**

Dr. Felix Bernstein, German mathematician and statistician, says he can examine a person's eyes and tell the subject approximately how many more years he has to live, barring accidents or unexpected complications.

His theory of the "accommodating power" of the human eye rests on the promise that the lens of the eye gradually hardens from birth, its "accommodating" power diminishing steadily and consistently until death from natural causes ends the life span.

Before he went to New York as visiting professor of mathematics at Columbia University, Dr. Bernstein said, he studied more than 1,000 individuals at his clinic in Göttingen during a three-year period, thus proving to his own satisfaction that his theory of life expectancy was correct.

Eye disorders and the mere fact that one wears glasses bear no relation at all to the aging of the eye lenses, Dr. Bernstein declared and gave no weight in the calculation of life expectancy. Only the hardening of the lens which in itself induces failing eyesight as the years fall away, is taken into account.

**Destruction Of Game**

**Wolves In Northern British Columbia Cause Depredations**

Trappers of the Cassiar district in northern British Columbia have reported serious destruction of big game and other animals by wolves roaming in large numbers through the wild country. They reported the lowest season's fur catch on record and place the blame on the exterminative game destruction by wolves.

Partially eaten carcasses of moose and caribou have been discovered in many sections, and few calves have been seen.

The trappers say removal of the government bounty on wolves several years ago is responsible for the rapid increase in the number of wolves. A petition will be submitted to the British Columbia government asking the bounties be renewed.

"The movies have accomplished one good thing, anyhow," "What is that?" "More and more people are learning to pronounce him in one syllable."

**SUNDAY SCHOOL LESSON**

MARCH 11

**PARABLES OF THE KINGDOM**

Golden Text: "Of the increase of his government and of peace there shall be no end." Isaiah 9:7.  
Lesson: Matthew 13:1-52.  
Devotional Reading: Proverbs 3:13-24.

**Explanations And Comments**

The Application of the Parables to the Disciples, verses 51, 52. Very readily the disciples answered "Yes" to Jesus' question whether they had understood his parables. "How Jesus must have smiled inwardly if not outwardly, at their simplicity," some one comments. "They had learned the alphabet and were trying to pronounce words of one syllable in the language of the kingdom. But the deeper meaning and richer content of that life abundant and eternal to which he would introduce them lay ahead as an undiscovered country."

"Therefore," since you have understood, as you say, you will have no difficulty in understanding this that "every scribe who hath been made a disciple to the Kingdom of Heaven is like unto a man that is a householder, who bringeth forth out of his treasure things new and old." "The Kingdom of heaven is here personified. It is viewed as the teacher, and just as young men who desire to be scribes resorted to the Scribal College, the Home of the Midrash, and sat at the feet of the rabbis, so the Christian scribe must go to school to the Kingdom of Heaven and receive its instruction. And this means that he must sit at Jesus' feet. Compare Luke 10:39. Jesus is the Teacher. Thus a scribe who hath been made a disciple to the Kingdom of Heaven signifies a religious teacher who has sat at Jesus' feet, learned his method, and caught his spirit." (David Smith.) Jewish scribes taught only things old, the Law and the Prophets: Christian scribes were to add to this the new teachings which they learned from their Master.

**YOUR HIDDEN TROUBLE**

Incomplete elimination of body wastes tends to a lessened vitality and general ill health. Even people with the most regular habits often suffer from this condition. It is the reason why you often feel weak and weary, or why you are unable to do your best work. To correct this condition is to follow the advice of Nature. Get enough sleep, fresh air, and exercise to keep your system in good condition. Get a brace, a supporting glass of Anker-Pain-Exterminator, and you will keep you in the pink of condition by helping Nature. Order your druggist sell Anker-Pain-Exterminator and the new large bottle 75¢. Agents: John A. Huston Co., Ltd., Toronto.

**Many Sailors Offer Services**

**Japan Is Recruiting Men For "Corps Of Death"**

Recruiting begins shortly in Japan for a "Corps of Death." If ever Japan goes to war with another naval power, not one of this corps will escape alive.

The Japanese Admiralty has recently perfected a new type of torpedo. It is fitted with a steering gear and room for a steersman.

The torpedo will be launched from a warship with the steersman already inside, and he will guide the missile toward the enemy ship.

If his hand is steady he cannot miss his mark. It means certain destruction for the ship, and for him also. No steersman could possibly escape alive when the torpedo exploded.

There will be little difficulty in recruiting for the Corps. Japanese men, with typical Oriental fatalism, think that to die for his country is a man's greatest achievement. Already many sailors have offered themselves.

They will go to a certain death and will make war more terrible than ever.

**Chinese Serve Free Tea**

Dr. Wu Lien-Tah, health adviser to the Chinese railways, says he thinks that free tea should be provided for passengers on long-distance journeys. Spiced drinking fountains are to be provided on many Chinese trains, the fountains supplying hot China tea in every compartment.

By F. M. CROWE, Optometrist-Optician, Calgary

**NO. 12—CONSERVATION OF THE EYESIGHT**

A world of beauty, emotion and ideas floods the brain through the eye. Sight is the medium by which the beauty of the human face and form and of all external life, is presented to us; by which the various expressions of passion and thought, of hope, joy and pain are discriminated and by which we take hold of a large portion of the pleasures, sorrows and possibilities of our very existence.

Under normal conditions we use about one half of our total nerve energy in the function of vision—one hundred times as much as is required for hearing.

To all of us the value of sight is pre-eminent. It is the most cherished of the five senses. It is the most used and, thoughtlessly and through ignorance, the most abused. A greater appreciation of sight is not necessary but a greater appreciation of the importance of eye-care is needed.

A large majority of the human race have eye defects, most of which are remedial. A lack of knowledge of the actual condition of each eye as regards the visual acuity and muscular balance, as well as a lack of proper eye care, is in a large measure responsible for much needless suffering and inefficiency.

Many people live to middle life before discovering that the vision of the two eyes is not the same. This condition of course puts too much strain on the better eye and the poorer one gradually gets worse from lack of use.

So many people are inclined to think their eyes are normal because they "see alright". Apart from the fact of whether or not both eyes have normal vision, many persons suffer from headaches, nervousness and kindred complaints due to faulty balanced eye muscles. One muscle being too weak, the eye would "tend" to turn toward the opposite or stronger muscle, but the brain desiring to see a single object where only one exists, keeps the eyes straight by using up excess nerve energy for the weak muscle, thus depriving other organs of the body of their proper share. Is it not therefore the part of wisdom to have a skillful Optometrist advise you whether or not your eyes are as they should be? (Concluded)

## LABOR PROBE MAY RESULT IN STATE ACTION

Ottawa.—State intervention in the men's clothing industry of Canada, which seems to be tottering to its death, dragging its workers with it, was proposed before the house business probe by Prof. H. M. Cassidy, of the University of Toronto.

After describing men and women in Montreal and Toronto working a full week of 72 hours for wages running as low as \$3 and \$4 in unsanitary, crowded sweatshops, the young, spectacled professor offered his solution of state intervention. He suggested extension and better enforcement of provincial labor laws which he claimed were being flouted openly to-day.

Within the industry would be established an agency for self-government, supported by the authority of the Dominion to prevent unfair practices and act in a constructive way to stabilize the trade to the benefit of workers, employers and consumers.

The house committee, established to probe business practices, general labor conditions and distribution methods, heard Prof. Cassidy give the results of a three-day inquiry into the men's clothing trade conducted last fall with Prof. F. R. Scott of McGill.

Here were some of the facts unearthed and conclusions reached:

The great majority of workers in the industry, centered in Montreal and Toronto, exist in abject poverty. The minimum wage laws and labor regulations of Ontario and Quebec have been flouted openly with regard to wages, hours, sanitary conditions and record-keeping.

Workers are afraid to complain to provincial wage authorities for fear they will lose their jobs and the provinces have inadequate inspection staffs.

Fines of \$10 and \$20 for infractions of labor laws are too light. Pressure from department stores has contributed to the deplorable condition of the industry by forcing manufacturers to accept orders at low prices.

Generally speaking, conditions in Quebec are worse than in Ontario because of lack of union control.

The Montreal strike last September and the establishment of union control resulted in immediate betterment, wages rising as high as 100 per cent. in some shops.

### Wide Tariff Powers

Premier Of France Gives Authority To Modify Levies.

Paris.—Gaston Doumergue, emergency premier of France, overrode all opposition in the chamber of deputies, and in an early morning budget session obtained dictatorial tariff regulating powers on a vote of 430 to 152. A special bill giving M. Doumergue authority to change tariff by decree in the same manner that he is now making governmental economies was passed and sent immediately to the senate.

The bill will give him power to modify the tariffs by decree until next Dec. 15, subject to ratification modifications by parliament within four months.

### Honor For Canadian Woman

Montreal.—Miss Edith Saint-Jean, president of the Canadian Alliance for Women's Vote in Quebec, has recently been made a member of the "Equal Rights International" which has its headquarters in Geneva. Among the membership of this large and powerful organization are many important women from all over the world, with Mrs. Helen Archdale as chairman.

### Urge Lower Speed Cars

San Francisco.—A resolution urging legislation be enacted forbidding manufacture and sale of automobiles which can exceed the legal speed limit of 45 miles an hour in California has been adopted by the Northern Federation of Civic Organizations, Joseph Hagan, president of the group, said.

W. N. U. 2098

## New Way To Test Clover

Saskatchewan University Student Makes Important Discovery

Saskatoon.—Discovery of an aniline solution with which the bitter-tasting sweet clovers may be detected . . . sought by scientists of several nations—was announced at the University of Saskatchewan.

The find was that of John S. Clayton, Regina, distinguished student in science, who is working on his Master's degree. The study was undertaken at the request of the federal forage crops laboratory and was under supervision of Dr. Ralph Larmour, of the university's chemistry department.

Discovery of an inexpensive method to test sweet clover is an important step in the transition of this species from that of a useless weed to a high position as a forage plant.

The solution, already tested in the government laboratory, will enable agriculturists to produce strains that have not the bitter taste that mark others as unsuitable for fodder.

Ustermyer, German scientist, has invented a method that proved slow and required much material. A similar result was obtained by two Russian scientists. The Saskatchewan find is simple and inexpensive.

P. M. Stevenson, who is in charge of the government laboratory here, predicted further development in the transition of sweet clover. He saw the time when it would no longer be necessary for the farmer to scarily weed.

Clayton graduated with distinction in chemistry in 1932. He is a nephew of M. J. Coldwell, Farmer-Labor leader in Saskatchewan.

## Greetings For Prince George

Orange Free State Gives Cordial Welcome To His Highness

Bloemfontein, South Africa.—Prince George came to the Orange Free State after a 3,000-mile tour of the Cape province, assured of a magnificent welcome from this greatest of the Dutch-speaking provinces of the Union of South Africa.

The most impressive of the welcomes have come from wayside railway stations or little towns, where farmers have come long distances for a brief visit of the royal train.

At Bloemfontein the prince was given an enthusiastic welcome.

### Would Like Ancient Church

San Francisco.—A proposal that one of the 19 condemned ancient churches, built in London after its great fire of 1696 be transported to San Francisco and re-erected on one of the city's hills has been made by Captain Edward Page Gaston, fellow of the Royal Geographical Society, in an address at a sectional luncheon of the Commonwealth club.

### Revenue From Wage Tax

Winnipeg.—Coffers of the Manitoba treasury were enriched by \$84,481 for the eight-month period from May 1 to December 31 last under the two per cent. wage tax, Hon. D. L. McLeod, municipal commissioner, told the Manitoba legislature here.

### More Trouble In Ireland

Dublin, Irish Free State.—The dall stream was thrown into an uproar as John A. Costello, former attorney-general, pounded his desk and shouted that the blueshirts of General Eoin O'Duffy would be victorious in their fight against the government.

### Miners Are Disappointed

Cape Town.—South African gold miners got a severe disappointment with authoritative denial of a report the government would give them a bonus totalling \$2,500,000 out of its share of the excess profits resulting from the new premium on gold.

### Rescue Planes

Moscow.—Three of Soviet Russia's foremost Arctic flyers were en route to the United States to participate, if necessary, in the rescue of 101 persons stranded on ice floes in the Bering sea.

### Consider Arms Plan

Paris.—The acceptance of an agreement recognizing Germany's demands for more arms and entitling France to retain her present strong army was reported to be under consideration by Premier Gaston D.-umergue.

## STARTS OFFENSIVE

Great Britain's disarmament offensive in a final effort to break the Franco-German deadlock and resume the arms parity at Geneva or elsewhere, has begun with the arrival in Paris of Captain Anthony Eden, British Lord Privy Seal. The British plan calls for a nine-power parity.

## Would Grow Coarse Grains

Seek Federal Subsidy And Freight Rate Reduction

Edmonton.—Hoping to turn western farmers from wheat growing to the coarse grains, oats, barley and rye, the prairie governments are seeking freight rate reductions and federal subsidies.

Hon. George Hoadley, minister of agriculture, "when speaking in the legislature, said the prairie provinces have decided to petition the Dominion government to reduce freight charges on coarse grains shipped to eastern Canada and British Columbia.

Also, the Dominion is being asked to subsidize any production of coarse grains seeded on summerfallow land this spring, said the minister. Hon. Mr. Hoadley was explaining at the time steps taken with a view to implementing the London treaty to curtail wheat production.

## Bank Swindle In Argentina

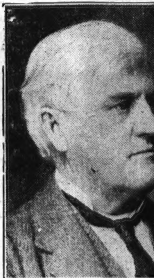

Clerks Arrested But Officials And Money Are Missing

Buenos Aires.—Police raided a bank, arrested all the clerks, but said they found the entire board of directors and two executives missing—along with more than 4,000,000 pesos (approximately \$1,250,000). In the strong boxes were exactly 96 pesos (about \$32) and a directors' note for 50,000 pesos (approximately \$16,670). Officers called it the most extensive swindle in the two years Argentina has had currency exchange control.

### Hunting Squirrels

Enid, Alta.—Low grain prices, with many fields still unthreshed, have turned farmers of the High Prairie-Grouard-Enid district from the land to squirrel hunting this winter. A booming business in wild fur has developed and one buyer has bought \$11,000 worth of fur from stores so far this season. Squirrel skins have become an almost standard medium of exchange in his locality.

## ONLY SURVIVORS OF 1930 HOUSE PERSONNEL

Thirty-four years ago two young members of the House of Commons at Ottawa entered the Commons Chamber and moved and seconded the address in reply to the speech from the Throne. Since then they have seen 1,080 members come and go in 38 sessions, and are now the only survivors of the 1900 House. Left: Hon. Charles Maclellan, Liberal member for Bonaventure, was one of them, and across the floor sits the other veteran (right), Hon. Hugh Guthrie, Minister of Justice.

## New Tariff Experiment

President Roosevelt To Negotiate Agreements With Other Countries

Washington.—Democratic leaders of the United States congress agreed to try a new tariff experiment by extending authority to President Roosevelt to change rates by as much as 50 per cent in negotiating agreements with other countries.

Mr. Roosevelt will send a message to the capital in the next day or so requesting such power to deal with the tariff—an issue that has been the firebrand of United States politics for years.

Under the tariff authority proposed the president would not have to deal through the tariff commission. He would not, however, have the right to take articles off the free list or to put articles on the free list.

The new plan would permit the president to bargain with other countries separately, giving reductions in tariffs in return for counter-reductions by the other countries.

## New Chinese Empire

Henry Pu Yi Is Enthroned As Emperor With Elaborate Ceremonies

Haikang, Manchukuo.—A new empire was ceremonially created with the enthronement of young Henry Pu Yi, the last of his dynastic clan. Clad in gorgeous ceremonial robes of silk in ancient pattern, he left the imperial palace at 8 a.m., beginning ceremonies which made him Emperor Kang Teh of the Japanese-advantaged Manchuria empire, which henceforth will be known as "Ta Manchou Ti Kuo."

The emperor's wife, Yuch Hua, did not participate in the ceremony owing to delicate health. The booming of 101 guns proclaimed to the assembled multitudes in the capital the establishment of a new regime.

## Riots In New York Jails

In Continuous State Of Siege For Eight Days

New York.—Gotham's "Devil's Island"—a unit of prisons and city hospitals in the middle of the East river—has been in a continuous state of siege for eight days. Commissioner of Correction Austin H. McCormick, in a speech, said the island was "twin volcanoes ready to blow the roofs off the prisons. Our chief problem is idleness and until that is overcome we will have trouble," he said.

Prison guards, it was disclosed, have been on 24 hours riot duty both in the hospital and in the penitentiary where 1,200 men have participated in six riots and kept the prison in a state of incipient mutiny.

### Build New Highway

Calgary.—Operating in conjunction with the Canadian government, the United States will shortly start construction of the United States end of a proposed highway to connect Waterton Lakes park and Glacier National park, Montana, according to an announcement of the Calgary branch of the Alberta Motor Association.

## JAPANESE SAY NO FEAR OF WAR WITH RUSSIA

Tokyo.—The world need not be afraid, said a government spokesman after an exchange of diplomatic representations between Tokyo and Moscow, that Russia and Japan are on the verge of war.

The Japanese government, in a protest sent to Moscow through the Japanese ambassador there, charged that Soviet planes had flown over Korea and Manchuria, and demanded guarantees that such flights would cease.

At the same time the Russians protested to the foreign office that Japanese planes had been sighted in Soviet territory.

A war department spokesman viewed the alleged incidents as somewhat less serious in nature than did even the government spokesman.

Moscow.—The Soviet government denied Soviet planes had flown over Korea and Manchuria, as charged by the Japanese, and at the same time filed a counter charge that Japanese planes had been flying over the Russian side of the Manchukuo frontier.

A formal protest was lodged with Japanese Ambassador Ota, saying that a "few" Japanese planes penetrated 10 kilometres into Russian territory near Pogromichnaya and Inan several days ago.

It was denied officially that Soviet soldiers had shot down any Japanese planes.

## A Hardy Pioneer

Hikes 16 Miles On Snowshoes In 45

Sudbury, Ont.—With his greying hair singed from the fire that destroyed his cabin and his feet frozen from a 16-mile hike on snowshoes in 45 below zero weather without boots, nose, coat or hat, Albert Davis, 38, arrived at hospital here, and said to attendants, "Take that wheel chair away. I got here on my own feet. I guess I can get upstairs on them."

Davis dismissed exclamations of admiration for his endurance with a wave of his hand to talk about his Belgian police dog, Nipper, who saved his life by waking him when the cabin in which he lived alone caught fire.

## To Discuss Trade War

Successful Outcome Expected From Franco-British Conference

Paris.—Negotiations to end the Franco-British trade war and establish a new French economic policy will be held in London, it has been announced.

Lucien Lamoureux, minister of commerce, will head the delegation to London, which he said has "fair chances of success."

A British note asked a trade treaty between the two countries to replace those denounced by France February 13, opening the economic "war" between them.

A flexible bargaining tariff will be the feature of France's new policy.

### French Wheat Act

Paris.—Reports were current that the French Wheat act, passed last July, had proved a failure and that confirmation of good crop reports for 1934 would bring a wide break in prices. Coupled with these rumors were accusations that farmers had resorted to widespread fraud as a means of getting the minimum price guaranteed by the act.

### Opposes Sweepstakes

Ottawa.—Strong opposition to the legalization of sweepstakes was voiced in the senate by Hon. H. C. Hocken of Toronto. He spoke while the sweepstakes bill was before the senate on second reading. The debate was adjourned by Senator James Murdock.

### Plans Are Approved

Washington.—First steps in the program of retiring poor United States agricultural lands from production were taken as President Roosevelt approved plans prepared by three divisions of the government.

### State Medicine Report.

Considered to be one of the most complete and exhaustive reports on the subject of health insurance ever presented in Canada, the findings of a joint Legislative committee representing all parties investigating the question for two years, was tabled recently in Alberta Legislature.

Systems of medical administration and operation in various parts of the world were examined, and careful consideration given to the many phases of the extension of medical service, especially as they apply to this province.

To meet Alberta's special needs, a form of contributory insurance is suggested for the more settled districts, under municipal direction; but for the frontier districts unable to maintain a complete medical service the Commission recommends a State-subsidized medical doctor, assisted by a nurse. Some districts might be served by a nurse alone, while in others the supplementary work of traveling clinics would meet the need.

One of the important recommendations of the Commission is that a State fund, centrally controlled and administered by a State board, be established for insurance carrier purposes. It further recommends that local advisory committees be established for each unit.

Many of the features, such as nursing services and clinics in pioneer districts, have been in operation in Alberta for some time. The scope of the new suggestions, completed medical and surgical coverage of the province, on a State plus contributory basis, are far reaching and novel in that there is no particular area in the world where all the features involved can be found.

The report recommends that the minister of health be given statutory authority to constitute areas as full-time health districts, and to determine what proportion of the cost of administration shall be borne locally and what share by the province.

Under the ten million dollar ultimate medical service scheme there would be \$3,583,647 for hospitals, \$3,173,142 for doctors, \$729,699 for drugs, \$1,499,190 for dentists, \$475,800 for preventive care. In addition, there would be \$947,147 for administration, \$189,429 for contingency reserve. Per capita cost, \$14.50 per year or \$1.21 per month.

On the basis referred to in the report, an employee would be responsible for 5ths of \$1.21 per month for each of his dependents and himself or 67c per month.

An individual not an employee would be responsible for seven-ninths of \$1.21 per month for each of his dependents and himself, or 84c per month.—From the Bulletin issued by the Publicity Commissioner, Dept. of Agriculture, Edmonton.

### News Briefs.

From Aug. 1933 to end of Jan. 1934 2750 vessels passed thru the Panama canal, paying tolls of \$11,991,758; in the same period of 1933 2295 vessels passed thru with toll payments of \$10,055,058, the U.S. War Dept. states. Canada charges no toll on vessels passing thru its canals, the costs being borne by Canadian taxpayers.

"If prosperity is returning, it is in spite of retarding, sadly retarding, taxation," was the statement of Sir Henry Drayton, former Dominion finance minister, speaking recently at Winnipeg, in the campaign of Canadian chamber of commerce for sound public finance and the necessity of reducing federal, provincial and municipal costs.

Twelve days of sea and sun on board luxury trans-Pacific liners and 24 hours at the mid-Pacific playground of Honolulu are featured in an unique vacation offered by the C.P.R. and Canadian-Australian Lines next May and June. A low rate of \$150 has been set for the round trip from Vancouver and Victoria.

Prizes totalling \$1125 were distributed to winners of the Qu-bee International Dog Derby, a 120-mile course, Feb. 2-5. It attracted leading mushers from Canada and the U.S. The first prize with which goes the Holt Renfrew Challenge Cup was for \$325 and there were 9 others.

Making dreams of cruising the Great Lakes in his own craft, come true, R.E. Larmour, retired C.P.R. district freight agent, is building a 2-masted schooner in which he and some friends will shortly embark for a long cruise.

A speed of 52.96 miles per hour was attained by R. Ball and W. Trower of the Montreal Ski club in the Flying Kilometer Ski contest recently staged in the Laurentians, just north of the City of Montreal.

### Open Seasons for Game.

Deer, moose, Nov. 1 to Dec. 14. Ducks, geese, Sept. 15 to Nov. 14. Elk, Oct. 1—Dec. 14. Grouse, Oct. 1—31. Hungarian Partridge, Sept. 15—Nov. 30. Fox, Nov. 1—Jan. 31. Mink, martin, otter, Nov. 1—March 31. Muskrat, March 1—April 30.

### Stony Plain and District

Mr L. E. Duval, V.D., left this week for Ferintosh.

The sale is reported of the old Merchants bank building to a local man.

Mr John Grimm, who had been staying the winter with Mr Phil Althem, left Mouday for Peace River.

A construction squad from the Dep. of Telephones this week installed a new service for a patron on 3d ave. east. The wires were strung on the C.P.C.'s poles.

Pastor Eberhardt's catechism class starts Monday next on a twice-a-day-five-day-a-week schedule until March the 23d.

Get your trapper's license at The Sun Office.

BUTTER AND EGGS WANTED at The Royal Cafe.

### Reduce Cost of Auto Licenses

Reduction of automobile licenses by 20 p.c. will take effect on Sunday, April 1st, the same as last year. When questioned in the Legislature on Monday as to whether any change was proposed, Premier Brownlee replied that the discount would be the same as in 1932.

### Spruce Grove News

Mr and Mrs Carl Schultz were given a reception, Sunday last, at St John's Lutheran church, Edmonton, to celebrate the 60th anniversary of their wedding day. Mr and Mrs Schultz were married in Austria, and homesteaded in Spruce Grove district in 1899. They have resided in the City for the past few years. Old friends of theirs in this district attended the celebration.

Mrs Wm Willie and her 2 children Emily and George have returned to their home at Lacombe. Young Mr Walt Goebel accompanied them.

Miss G. E. Johnston left on Friday for a visit with friends at Ledou.

Mr Charles Ries on Friday returned to his home in Vancouver.

Mrs Malcolm McLeod, well known at the "Y" Vesper service held in Edmonton last Sunday.

Mr Joe Fuhr is expected to arrive here from Wembley, to take up his farming duties.

**ARMBRUSTER LUMBER COMPANY**  
 Phone 29. Night 4.  
 STONY PLAIN.

### Secures Decree Nisi.

Mary Ulmer, of Stony Plain district, was granted a decree nisi of divorce from her husband, Jacob S Ulmer, by Mr Justice Ives in Supreme court, Edmonton, last week, following the hearing of an undefended divorce action brought on the usual statutory grounds. The couple were married in Stony Plain in the year 1928. Unless cause is shown, the decree becomes absolute after three months. George J. Bryan appeared for Mrs Ulmer.

### Horses in Demand.

Work horses are in demand this spring, according to those grain-raisers who have been endeavoring to pick up an animal or two, to augment their outfits for the spring work. Horses which are for sale locally are being held at new high figures, so it is said. Those localities who have gone to the City for work horses have found that prices there are practically the same there. The increasing number of farmers who are going back to using old Dobbin for their work in the field is said to be responsible for this.

### Gone to Viking.

Mr Wm Comisarow, one of Stony's young merchants, on Monday opened up a general store at Viking. "Bill" came to town in October, 1925, started a store, and by his good salesmanship and fair dealing, worked up a good business there. "Bill" took quite an interest in winter sports, being one of our leading curlers and broom ball players. The large army of friends of Bill, who now mourn his departure, will wish him luck and heaps of prosperity in his new enterprise.

### Sun Letter Box.

[The Sun takes no responsibility for opinions expressed by correspondents.]

Editor Sun, Sir: A perusal of your news column in last week's issue shows tenders are being called for a property situated on Main street—lot 1 block 10 plan 4180R, to be exact. On inquiring, I was informed this was the lot opposite Wudel's implement warehouse to the south. If this be correct, this is the lot reserved by the Provincial Government a number of years ago on which a phone exchange building for Stony Plain and district was to be erected. Residents of the town have been looking these long years, for the fulfillment of the promise that a suitable telephone exchange building be erected on this site. Thru the early years of the present Provincial Government there appeared to be always the chance that this would come true. As late as the year 1931 (following the last Provincial election) there was a strong rumor current among supporters of the Government that we would come down town some fine morning and find the materials for this building on the site. The recent action of the Government in disposing of local rural phone lines to farmer-owned system, is given as the reason for the change. All of which no doubt indicates we're not to have an election this year.

—A. RESIDENT.

### Cream Prices Up.

H. B. Bjork, agent for Swift-Canadian Co., announces a big up jump in the prices of cream. Yesterday's prices were No. 1 49c, No. 2 47c, and No. 3 44c.

### On the Side.

Despite the recent spell of damp, fine weather, so unsuitable for playing good hockey, the Stony Plain Junior Hockey Team has been able to maintain its enviable record of never having lost a game this season of 1933-4. To do this, was not in the nature of luck, but required an almost unprecedented display of playing skill and technique, combined with the will to win. The sporting world, including local hockey fans, would like to see Stony Plain's Junior Hockey Team in action just once more before it is "relegated to the domain of innocuous demerits," as "Big Bill" Taft says. "C'mon, let's go!"

—In an article on Omer St. Germain in last week's Stettler Independent, Editor Willis says: "Politics would be a dull business if there were no French members in Parliament, and after wading thru hundreds of pages of Hansard, I have come to the conclusion that what the Dominion and Provincial Houses need in more St. Germain, Lapointe and Giroux, to give tone to the debates. Outside of Mr Irvine, the UFA members are as dry as the elements of Enid, while the Liberals have only Mr Howson and Mr Motherwell to stir things up once in a while, altho we must admit that Premier Bennett is so full of dignity that some of his speeches are samples of real humor."
